SUMMARY

Software Engineering undergraduate specializing in Information Science with strong foundations in Data Structures and Algorithms, SQL, Java, C, along with experience in Generative AI and AI tools. Passionate about solving real-world problems, contributing to high-impact systems, and seeking Software Development Engineer (SDE) and Data Analytics roles while continuously advancing technical and professional growth

EDUCATION

B.E., Information Science & Engineering , BMSIT&M, Bengaluru CGPA: 8.95	2023-2027
Narayana Junior College CGPA: 8.2	2021-2023
Presidency School Percentage: 89%	2011-2021

PROJECTS

PlaceSmart – Campus Placement Management System (MERN + Python) [Repo Link ↗](#)

Skills: React, Node.js, Express.js, MongoDB, Python, RESTful APIs

- **Built a full-stack web application for campus placement management** enabling student onboarding, resume uploads, job applications, and real-time tracking through a dynamic web interface
- **Designed RBAC (role-based access control) for Students, Admins, and Coordinators** to streamline job postings, profile management, and application lifecycle processes
- **Developed a Python-driven resume evaluation module** to analyze profiles and recommend relevant job opportunities using intelligent matching techniques

Traffic Prediction System Using Hybrid Model [Repo Link ↗](#)

Skills: Python, Machine Learning, Deep Learning (LSTM), Data Analysis, APIs, Streamlit

- **Designed a hybrid forecasting system** combining Random Forest, XGBoost, Extra Trees, Linear Regression, and LSTM, achieving 94% accuracy across multiple datasets
- **Constructed data pipelines** with preprocessing and feature extraction on historical traffic, temporal patterns, and weather inputs, incorporating live data via external APIs
- **Created an interactive Streamlit dashboard** to visualize congestion levels (Low, Moderate, Heavy), generate real-time forecasts, and display model insights for better decision-making

Library Management System [Repo Link ↗](#)

Skills: MERN Stack, MongoDB, React.js, Node.js, Docker, Jenkins, CI/CD

- **Developed a full-stack Management System** for managing books, issue/return operations, and user records
- **Implemented JWT-based authentication and role-based access control** for secure admin and student access
- **Containerized the application using Docker** for consistent deployment and environment management
- **Integrated Jenkins CI/CD pipelines** to automate build, testing, and deployment workflows

TECHNICAL SKILLS

Languages: Java, C, Python, SQL

Frontend: HTML, CSS, JavaScript

Backend: Java, Python, PHP, RESTful APIs

Frameworks / Libraries: React, FastAPI, JDBC

Tools: Git, GitHub, XAMPP, MySQL, AWS, Docker, Jenkins

Core Concepts: Data Structures and Algorithms, Database Management System, Object-Oriented Programming, Computer Architecture Fundamentals, Digital Circuits, Cloud Computing, Operating System, Cyber Security Fundamentals

CERTIFICATIONS [view ↗](#)

- **Generative AI tools and Agentic AI** – Outskill
- **User Interface and User Experience Design (UI/UX)** - Ideathon
- **Computer Vision, Chatbot Creation** - Coursera
- **Cybersecurity Training** – Check Point Secure Academy
- **Project Management and Overview of Agile and DevOps** – Infosys Springboard
- **Hands-on Cloud Skill Badges** – Google Cloud Platform (Qwiklabs / Google Cloud Skill Boost) [view ↗](#)

ACHIEVEMENTS

- Achieved **SQL Proficiency** from NPTEL
- Qualified **GATE 2026 (CSE)** with **AIR 18020**, ranked in the **top 8.5%** nationwide
- Coordinated 3 Technical Events, managing timelines and deliverables while balancing academics and projects
